

# Erasure processes made easy

Just register and get started. With Hosted Erase the erasure, the management or the proof of any number of erasure processes is a breeze.

**Hosted Erase enables a simple execution and a centralized management of all your erasure processes including detailed reports under a common web interface**

## Hosted Erase – Simple and documented erasure

- Centralized web management of your entire erasure processes
- Already performed erasures of connected computer or handheld devices are transmitted and recorded
- No need for setup or operation of Web servers or SQL databases
- Installation of HASP key or license manager is not required
- Easy Setup of Blancco Erase software on the user machines to securely delete data from computers and mobile devices
- Erase client supports the leading solutions for secure deletion - Blancco Blancco 5 and Blancco Mobile
- Easy selection of available erasure option on the client

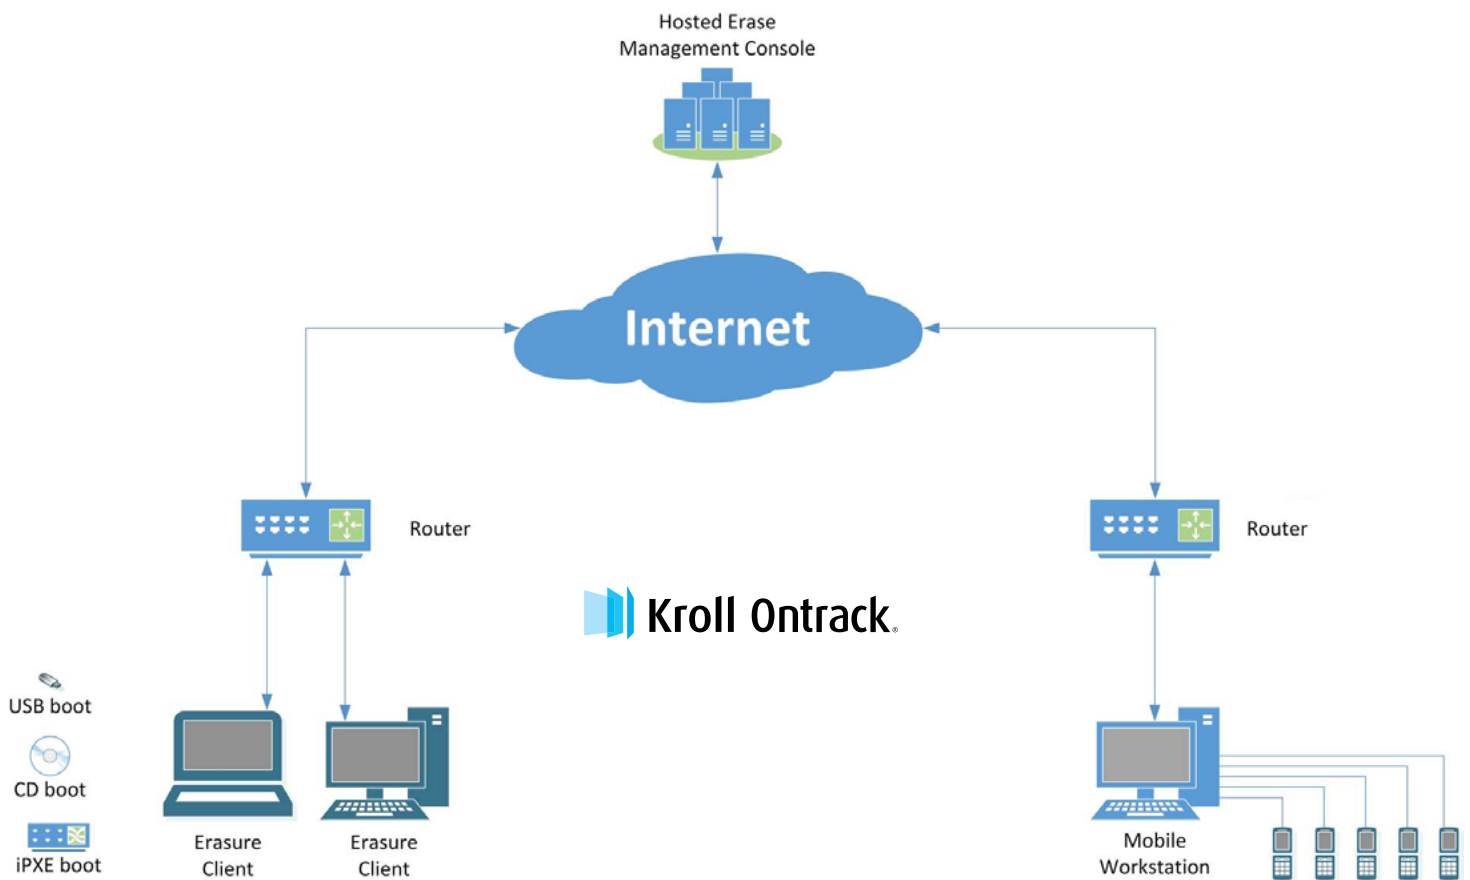

## Manage user rights and licenses centrally

- Central administration, control and allocation of user rights
- Administration and control of all available and consumed licenses
- Acquired licenses are available for immediate use

## Comprehensive reporting of erasure processes

- Management of all reports about your accomplished erasures and processes
- Contiguous verification of satisfactory erasure of all data according to internal and external policies, laws and regulations
- Reports can be saved as CSV, PDF and XML file and further processed
